

EXPERIMENT-5A

ROLL NO: 240701244

NAME: KAVITHA R

Simulation of UI Design Lifecycle Using RAD Model and Development of Interactive Interface Using Axure RP

Aim:

The aim of this experiment is to simulate the lifecycle stages of UI design using the RAD (Rapid Application Development) model and develop a small interactive mobile interface using Axure RP.

TOOL USED:

Axure RP – UI/UX prototyping tool used for designing interactive wireframes and mobile interfaces.

PROCEDURE

RAD Model Overview

The RAD (Rapid Application Development) model focuses on quick development, prototyping, and user feedback. It consists of four main phases:

1. Requirements Planning
2. User Design
3. Construction
4. Cutover

Phase 1: Requirements Planning

1. Identify Key Features

The system developed is an Online Book Store Mobile Interface.

Main Pages

- Login Page
- Home Page
- Book Details Page
- Cart Page
- Booking Confirmation Page

User Actions

- User login
- Browse books
- View book details
- Add book to cart
- Confirm booking/purchase

2. Requirements Documentation

The application allows users to:

- Login into the system
- View available books
- See detailed information about a book
- Add books to the cart
- Confirm the booking/order

Phase 2: User Design

1. Create Wireframes in Axure RP

Using Axure RP, wireframes were created for the following mobile screens:

1. Login Page
2. Home Page

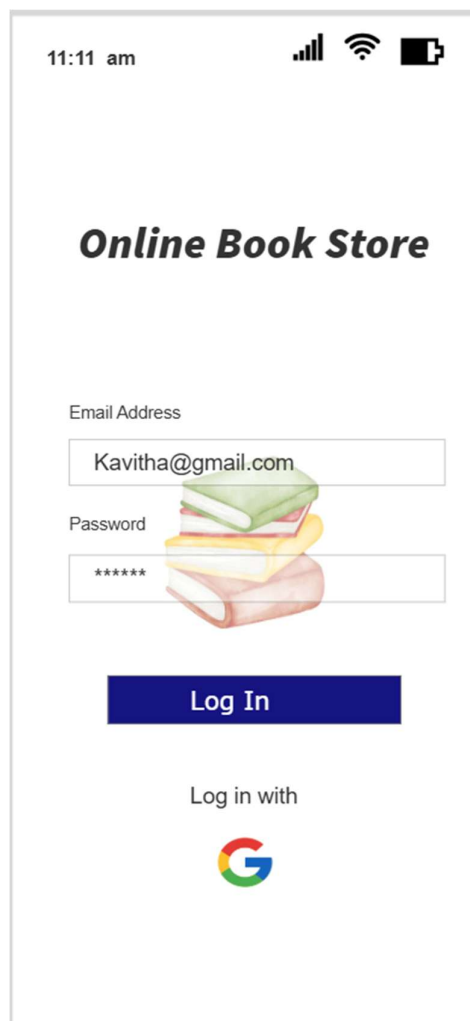

3. Book Details Page
4. Cart Page
5. Booking Confirmation Page

Login Page

The login page allows users to enter their credentials.

Features:

- Username field
- Password field
- Login button

The image shows a mobile application login screen. At the top, the status bar displays the time '11:11 am' and icons for cellular signal, Wi-Fi, and battery. The app title 'Online Book Store' is centered in a bold, italicized font. Below the title, there are two input fields: 'Email Address' with the value 'Kavitha@gmail.com' and 'Password' with masked characters '*****'. A stack of three books is positioned between the password field and the login button. The 'Log In' button is a dark blue rectangle with white text. At the bottom, there is a 'Log in with' label and a Google logo.

Home Page

The home page displays the available books.

Features:

- Book list
- Book images
- Book title and price
- Button to view book details

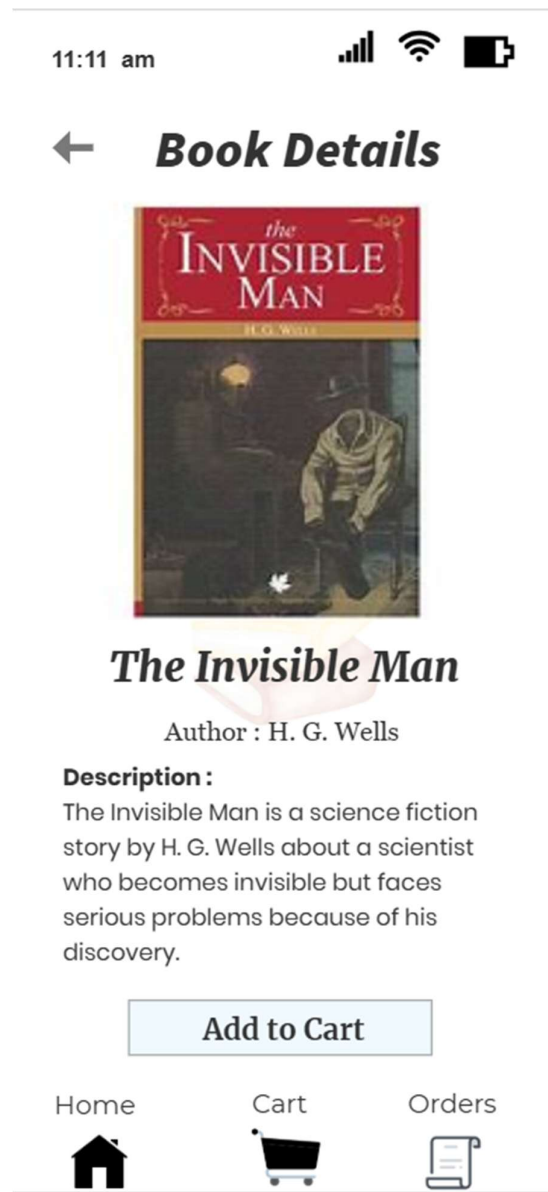

Book Details Page

This page shows detailed information about the selected book.

Features:

- Book image
- Book title
- Book description
- Price
- Add to Cart button

Cart Page

The cart page displays the selected books before checkout.

Features:

- Selected book list
- Price information
- Checkout button

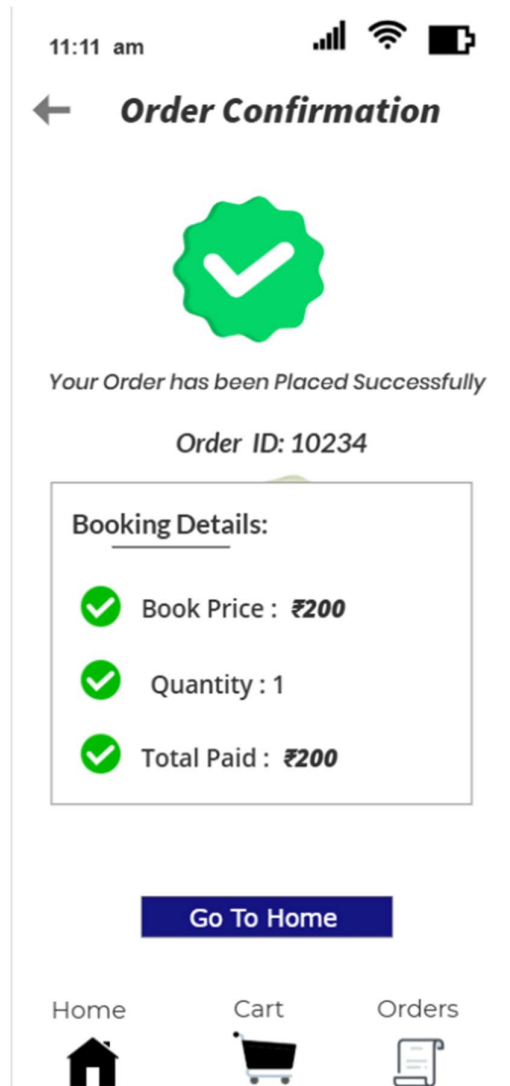

Booking Confirmation Page

This page confirms the successful purchase of books.

Features:

- Confirmation message
- Order details

Phase 3: Construction

Interactive Prototype Development

Interactions were added using Axure RP.

Example interactions:

- Login button → Navigates to Home Page
- Book selection → Opens Book Details Page
- Add to Cart button → Opens Cart Page
- Checkout button → Opens Booking Confirmation Page

The prototype was tested using the Preview option in Axure RP.

Phase 4: Cutover

Finalization and Deployment

After completing the design:

- The prototype was finalized.
- The interactive UI was exported from Axure RP.

User Support

Users were guided on how to:

- Login
- Browse books
- Add books to the cart
- Complete the purchase process

RESULT

The lifecycle stages of UI design using the RAD model were successfully simulated, and an interactive Online Book Store mobile interface was developed using Axure RP.
