

EXPERIMENT-8

ROLL NO: 240701244

NAME: KAVITHA R

Create storyboards to represent the user flow for a mobile app using Balsamiq

AIM:

The aim is to create storyboards representing the user flow for a mobile application using Balsamiq wireframing tool.

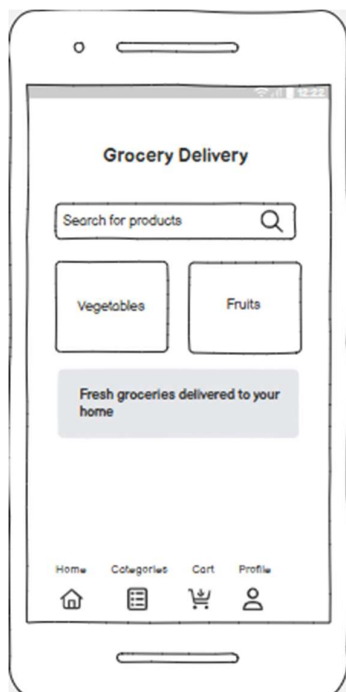

TOOL USED:

Balsamiq Wireframes

STORYBOARD SCREENS:

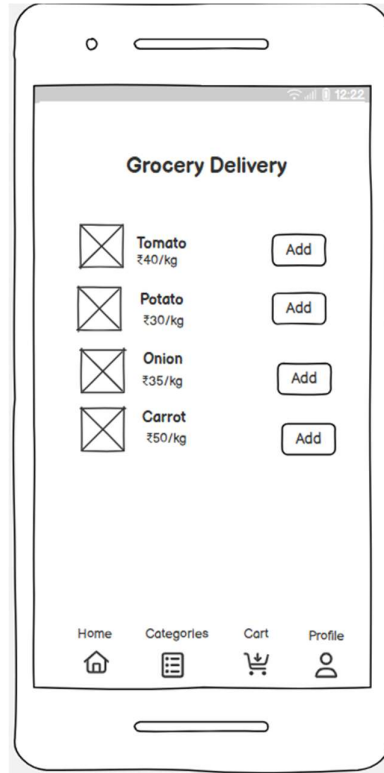

Home Screen

The home screen displays the application title, search bar, and product categories such as vegetables, fruits. Users can select a category to view available products.

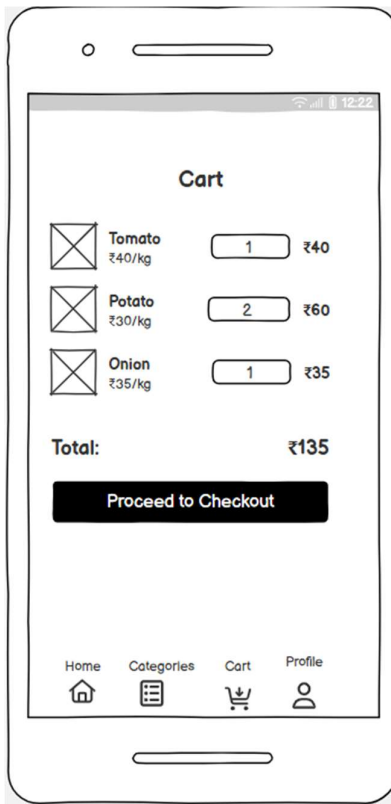

Product List Screen

This screen displays the list of products under a selected category along with their prices and an Add to Cart button.

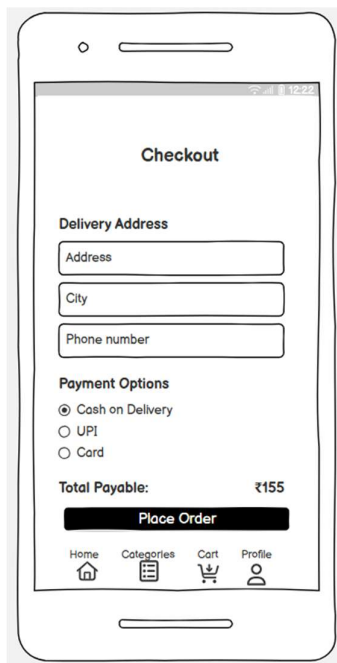

Cart Screen

The cart screen shows the selected items, quantity, and total price. Users can review the items and proceed to checkout.

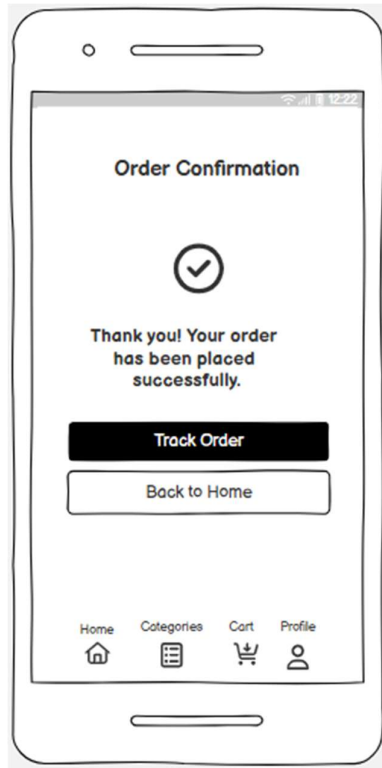

Checkout Screen

This screen allows users to enter delivery details. Users can also choose the preferred payment method and place the order.

Order Confirmation Screen

Shows the successful order message with order ID, order date, total amount, and estimated delivery time.

RESULT

Thus, the storyboard representing the user flow for a Grocery Delivery Mobile Application was successfully created using Balsamiq.
