

EXPERIMENT 3A

ROLL NO: 240701244

NAME: KAVITHA R

Create a prototype with familiar and unfamiliar navigation elements.

Evaluate ease of use with different user groups using proto.io.

Screen 1: Sign In Page

Purpose

The purpose of the Sign In page is to authenticate the user and provide secure access to the application.

Familiar Navigation Elements

The following familiar UI elements are used so users can easily understand the interface:

1. Email / Username Field

- A common text field used in most applications to enter the user's email or username.

2. Password Field

- A standard input field used to enter the user's password securely.

3. Login Button

- A widely used call-to-action button that allows users to log into the application.

4. User Icon and Lock Icon

- Common symbols used to represent username and password fields.
-

Unfamiliar Navigation Elements

To introduce a unique interaction, the prototype includes:

1. Swipe to Login Feature

- Instead of tapping a button, users can swipe the button to log in.
- This gesture-based navigation is slightly different from traditional login methods and adds an interactive experience.

2. Voice Prompt Message

- A text message such as *"Say Login to Continue"* suggests voice-based interaction, which is not commonly used in standard login pages.

Screen 2: Explore Places (Home Page)

Purpose

The purpose of this screen is to help users discover various tourist locations and select a destination they want to explore.

Familiar Navigation Elements

1. Search Bar (🔍 Search Destination)

- A common UI element used in most applications for searching content.
- Users can type the name of a place to find travel destinations quickly.

2. Destination Cards

- Card-based layouts are widely used in travel and e-commerce apps.

3. Destination Images

- Images help users visually understand the travel destination and improve user experience.

4. Grid Layout

- The destinations are arranged in a simple grid format, which is easy to browse and visually appealing.

Unfamiliar Navigation Elements

1. Voice Search (Microphone Icon 🎤)

- A microphone icon is placed inside the search bar.
- Users can tap the icon and **search destinations using voice commands instead of typing.**

2. Speech Recognition Interaction

- This provides a modern and hands-free navigation experience.

Screen 3: Destination Details Page (Ooty Hill Station)

Purpose

The purpose of this screen is to provide users with detailed information about the selected destination before they proceed with booking. It helps users understand the travel package, available facilities, and total cost.

Familiar Navigation Elements

1. Back Arrow (←)

- A common navigation icon placed at the top of the screen.
- Clicking it takes the user back to the **Explore Places page**.

2. Destination Image

- A large image of the destination is shown at the top to visually represent the place.

3. Information Text Section

- Displays details about the destination such as location description, travel package information, and available services.

4. Proceed / Book Button

- A call-to-action button that allows the user to move to the **payment or booking screen**.
-

Unfamiliar Navigation Elements

1. Interactive Travel Package Card

- The travel details (transport, hotel, price) are displayed in a card format.
- Users can easily view package details in one place.

2. Highlighting Important Details

- Important information like **price, number of days, and hotel facilities** are visually highlighted to attract user attention.

Screen 4: Payment Page

Purpose

The purpose of this screen is to allow users to securely complete the transaction for their selected travel package. After successful payment, the user will be redirected to the **booking confirmation screen**.

Familiar Navigation Elements

1. Back Arrow (←)

- A common navigation icon used to return to the previous screen (Destination Details page).

2. Payment Method Icons

- Standard icons representing different payment options such as:
- **UPI**
- **Credit / Debit Card**
- **Net Banking**

3. Amount Display (₹)

- The total price of the travel package is displayed clearly using the **Indian Rupee symbol (₹)**.

4. Pay Now Button

- A widely used call-to-action button used to complete the payment process.

Unfamiliar Navigation Elements

1. Quick Payment Selection

- Users can quickly choose a payment method by tapping the icon instead of filling long forms.

2. Smart Payment Suggestion

- The system highlights the most commonly used payment method (for example UPI) to make the process faster.

Screen 5: Booking Confirmation Page

Purpose

The purpose of this screen is to notify the user that the payment was successful and the booking has been completed.

Familiar Navigation Elements

1. Success Check Icon (✓)

- A commonly used symbol indicating that the payment and booking process was successful.

2. Confirmation Message

- A message such as “**Payment Successful**” or “**Your trip has been booked successfully.**”

3. Booking Details Section

- Displays information such as the **destination name and the amount paid**.

4. Home / Explore Button

- A button that allows the user to go back to the **home screen** to explore more travel destinations.

Unfamiliar Navigation Elements

1. Combined Confirmation Layout

- The screen shows both **payment confirmation and booking details together** in a single page, allowing users to quickly verify their booking.

2. Simple Success Highlight

- The check icon and confirmation message are placed at the center of the screen to clearly highlight the successful booking.
